seamless bottle
(1050A)

100% recyclable
Aluminium

Transport and storage
of aromatic material
samples and compounds

- liquid products
- viscous products

TYPE 9M6

Manufactured from 99,5% pure aluminium, the 9M6 range is offering an excellent physical and chemical resistance against chocks, perforation and damages caused by the transport, as well as a perfect barrier against light.

Main uses

Ideal for the storage and the transport of Fragrance & Aroma samples.

Used in the Beauty and well being sector, SPA, Beauty Institutes...

TYPE 9M6

Light and resistant

- 99,5% pure Aluminium.
- Excellent mechanical resistance : against shocks, perforation and bumps caused during the dispatch (compression).
- Chemical resistance directly ensured by Aluminium or, if necessary, thanks to an epoxy-phenolic coating.
- Protection against gas and light.
- keeps the product fresh during the storage.
- Lightness close to plastic materials.

Tightness

- Seamless structure.
- optimised neck flatness.
- Resistant and compressible liner (PE foam/Alu).
- Perfect tightness with perfumery products.

User friendly

- An unique standard closure system from 19 to 160 ml, standard Europa 6 caps available in Black or in white.
- Easy dosing thanks to the rolled on neck rim.
- Large opening facilitates pouring.
- Dropper available pre-pierced (for dispatch, transport of samples), in case of local usage **without transport**, a pierced plug is available, for internal use.

Options

- Plain Aluminium finish standard.
- External lacquering, silk-screen printing or overcaps: please contact us.

Recyclable

- High value of Aluminium scrap.
- Bottle is made of 100% Aluminium.

Note: user is responsible for checking the compatibility of its product with the Tournaire packaging system, see our general sales terms.

A range from 19 to 160 ml

Capacity per bottle (ml)	Quantity per box	Quantity per palett	Ø inside neck (mm)	Ø outside body (mm)	Bottle height (mm)	Label height (mm)	Weight (g)
